- Retrieving time zone information from contacts (and servers)
- Extension from 2006
- Responding to requests widely supported
- Display limited or none existent

Status quo: Gajim

The screenshot shows the Gajim interface. On the left is a sidebar for the contact 'daniel' with menu items: Information, Settings, Encryption (OMEMO), Groups, Notes, and Devices (which is selected). The main window is titled 'Devices' and displays details for a specific device: 'Conversations.UkvVTVM1Gi'. The details are organized into a table-like structure with the following rows:

Status	Available
Priority	0
Software	Conversations 2.19.13+free
Operating System	Android
Local Time	Sun 15 Mar 2026 10:53:16 AM UTC+08:00

Hackathon

- Participating projects: Dino (Linux), Conversations (Android)
